SPECIAL SERVICES MEMORANDUM - 143

Supplies-53

SUBJECT: Anthracite Coal for the Operation of Poultry Brooders and Hatcheries.

Revised Regulation 5 issued by the Solid Fuels Administration for War on September 28, 1944 and effective October 15, 1944 appears in Federal Register dated September 30, 1944. This memorandum supersedes instructions contained in War Board Memorandum No. 439, Supplies 43, Revised, issued October 29, 1943. It is suggested that State and county committees make the following information available to poultrymen and hatchery operators.

Under the provision of this regulation, each owner or operator who needs to purchase anthracite coal for the operation of a poultry brooder or hatchery must file, at or before the time of first delivery, a written statement with his dealer listing:

- (1) His annual requirement
- (2) Amount on hand as of April 1, 1944
- (3) The number of broods to be made prior to March 31, 1945
- (4) The number of brooder or hatchery stoves in operation
- (5) An estimate of one day's supply of coal (amount consumed in one day)
- (6) The location of the brooder or hatchery

The statement should be made on the form prescribed by S.F.A.W. Revised Regulation 5, (to be reproduced and furnished by the dealer - see Appendix A, Federal Register), and, as provided in the order, should be made to the same dealer who supplied the owner or operator with anthracite for such use during the period April 1, 1942 to March 31, 1943. In the event such retail dealer has discontinued business or is unable to fill an order, or in the event that the owner or operator of a poultry brooder or hatchery did not purchase coal for such use during the period April 1, 1942 to March 31, 1943, then the statement may be filed with any other dealer.

Without regard to other orders, preference in the delivery of anthracite coal shall be accorded to any owner or operator for use in a brooder or hatchery, but not to exceed a ninety day supply, in accordance with the following:

- (1) Coal producers and wholesalers shall accord preference to orders in carload or truckload lots from any owner or operator of a poultry brooder or hatchery for such use, or to any retail dealer for resale for such use.
- (2) Each retail dealer shall accord preference to orders in any quantity to any operator of a poultry brooder or hatchery for such use.
- (3) Sequence of preferred deliveries shall be in accordance with, first, the order of the purchaser who has on hand the least number of days' supply, or second, the delivery dates specified by the orders, or third, if it is impracticable to make such deliveries on the date specified, then in accordance with the dates on which such orders have been received.

(more)

Below are listed the Regional offices of S.F.A.W. where assistance may be obtained in case shortages develop or other problems arise concerning the operation of this regulation.

SPECIAL SERVICES MEMORANDUM - 144

Transportation-46

SUBJECT: Gasoline for Commercial Motor Vehicles  
Operated as a Farm Vehicle

This memorandum amends and supplements the procedure outlined on pages 7 and 8 of the Transportation Handbook, Special Services Memorandum 66, relative to the securing of supplemental motor fuel allotments for use in commercial motor vehicles.

Under the new procedure which is effective October 16, 1944, the OPA will have full responsibility for handling temporary increases in motor fuel allotments for one quarter or less and the ODT will retain the responsibility for permanent changes. The OPA is also authorized to make reductions in allotments when conditions warrant such action. CFIC's will cooperate with the OPA and the ODT by continuing to make recommendations for motor fuel allotments for commercial motor vehicles as defined in Section IV-A of the Transportation Handbook.

New Form. A new Form CWN-1 (Revised) is a consolidation of the former Form CWN-1 and NEO-1, and will be used to handle all requests for motor fuel of a permanent nature, extension of operation or a new operation, and appeals from ODT action. (OPA Form OPA-R-597 will be used in making application for additional motor fuel arising from temporary changes involving one quarter or less.) Supplies of these forms can be obtained from local War Price and Rationing Boards.

How New Procedure Will Operate. ODT's present certifications will remain in effect except where an application for a permanent change in allotment is approved by the ODT. Revision of certificate for changes in description of equipment only will be discontinued. The only reason a certificate will be corrected is because of a permanent change in motor fuel allotment or a new operation. Subcertificates will no longer be issued nor will it be necessary to cancel or recall them. OPA will determine and issue all temporary allotments for motor fuel for one quarter or less. Appeals will be filed with the agency which issued the determination from which the operator is appealing.

Where the local War Price and Rationing Board requests the County Farm Transportation Committee to recommend on applications for temporary increases in motor fuel allotments for one quarter or less, the committee should cooperate with the Board to work out a satisfactory procedure for handling these applications. The committee will continue to recommend on applications for permanent changes in allotments which will be forwarded to the ODT as in the past.

SPECIAL SERVICES MEMORANDUM - 145

Feed 16

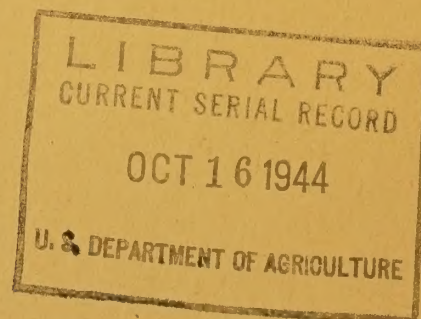

SUBJECT: Eligibility of Processors Who Have Also Been Retailers  
of Oilseed Meals in 1942 and (or) 1943 to File FPA Form 6

Cases have been called to the attention of the Feed Management Branch in which oilseed processors who are also feed dealers or manufacturers and who, because of lowered production, are unable to obtain from 80 percent of their production or from the trade as much oilseed meal as they used and (or) retailed on the average in 1942 and 1943. Because of this situation some of these processors are requesting that their set aside meal be returned to them for their own distribution or use.

In such cases the processor is entitled to file FPA Form 6 with the State committee and request an allocation of set aside meal. In any instance where 80 percent of the processor's production plus the amount of meal obtained by him from the trade is less than his average use and (or) retail sales for the average of the same months of 1942-43, such processor is entitled to consideration.

All applicable entries of FPA Form 6 shall be filled out when filing an application. The processor's 1942-43 average retail sales and use for the month in question will appear in columns 3 and 4 and 80 percent of his production of oil meal for the same month plus the quantity procured or to be procured from the trade will appear in column 6.

A letter bearing on this subject has been sent to all cottonseed processors, and a copy is attached for your information.

SPECIAL SERVICES MEMORANDUM - 146

Construction - 49

SUBJECT: Copper Wire

During the third quarter of this year the total allocation of copper for the United States for farmstead use was 1,400,000 pounds. Of this amount 1,271,344 pounds of copper were issued, leaving an unissued balance of 128,656 pounds of copper or 9.2 percent of the total quota for the United States.

In order that the fourth quarter copper allotment may be utilized to the fullest possible extent, we are urging each State Committee to examine its respective quotas and requirements and return any surplus quota to this office. If the State Committee believes its quota is too small, requests for additional allotments should be made so that adjustments can be made where justified. All returns and requests for additional allotments should be received by this office before the end of November.

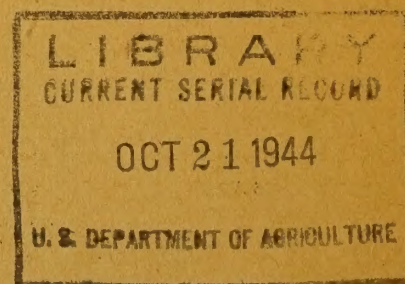

Listed below is a summarization of the distribution of copper wire during the third quarter.

THIRD QUARTER SUMMARY OF COPPER WIRE DISTRIBUTED  
BY AAA COMMITTEES

State	Quota (pounds)	Total Issued (pounds)	Amount Unissued (pounds)	(percent)
<u>East Central Region</u>

SPECIAL SERVICES MEMORANDUM - 147

Construction-44  
Supplement 3

SUBJECT: Lumber

This memorandum supersedes Special Services Memorandum 132,  
Supplement 1, dated September 8, 1944.

Farmers may obtain certain grades and species of lumber without certificates or ratings under provisions of Directions 1 through 7, of Order L-335, as amended October 16, 1944. The following information is presented so that State and County Committees may advise farmers, dealers and small sawmills as to the provisions controlling the release and purchase of such lumber.

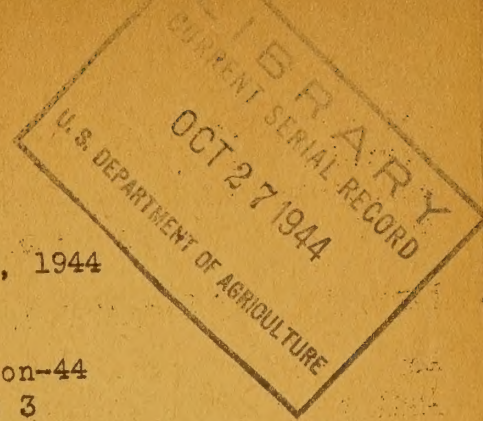

I. Provisions of Directions 1 Through 5 Regarding Uncertified and Unrated Orders.

Sawmills specified below which have not been offered certified orders for all their lumber may ship (or release) the balance to lumber dealers or consumers on uncertified and unrated orders providing such shipment (or release) will not interfere with the filling of a certified order:

Mills which are currently producing less than the listed amounts of lumber (whether or not one of the species named below) per average day of eight hours of continuous operation or which produced less than these amounts per day they were in operation during the days from June 3, 1943 to December 3, 1943.

- a. Douglas Fir, White Fir, Noble Fir, Sitka Spruce (except aircraft grade) and West Coast Hemlock -- 25,000 board feet.
- b. Ponderosa Pine, Sugar Pine, Lodgepole Pine, Idaho White Pine and White Fir (except Idaho White Pine and White Fir produced west of the crest of the Cascade Mountain Range in Oregon and Washington), Western White Spruce and Engelmann Spruce cut by mills in Washington, Oregon, California, Idaho, Montana, Wyoming, Nevada, Utah, Colorado, Arizona, New Mexico and South Dakota -- 10,000 board feet.
- c. Redwood cut by sawmills in California -- 25,000 board feet.
- d. Southern Yellow Pine cut by sawmills in any State -- 5,000 board feet.
- e. Cypress (red or yellow) cut by sawmills in any State -- 5,000 board feet.

(over)

The above provisions mean that farmers may now purchase without certificates or ratings from mills producing daily less than the quantities of lumber specified above if these mills do not have certified orders for their entire production.

II. Provisions of Directions 6 and 7 Regarding Uncertified and Unrated Orders.

Any person may purchase without certificates or ratings all species of lumber not controlled as in I above and in addition the following grades, regardless of the size of mill, provided such delivery will not interfere with the filling of a certified order:

Number 4 or lower grades of Douglas Fir, Southern Yellow Pine, Western Hemlock, Sitka Spruce.

Number 3 or lower grades of Cypress or Redwood dunnage.

E grade of Douglas Fir or Western Hemlock.

Release of such lumber under the above conditions may be made by sawmills to dealers or directly to consumers or by dealers to consumers.

This means that all grades of hardwoods and all grades of certain species of softwoods not restricted by I above may be purchased by farmers without certificates or ratings from sawmills or dealers if these lumber suppliers do not have certified orders for their production or stock.

Other than the restrictions outlined above all grades of Douglas Fir, Larch and Red Cedar are available for farmers' use in the 17 Western and North Central States as outlined in Special Services Memorandum 134, Supplement 2, dated September 11, 1944.

October 24, 1944

SPECIAL SERVICES MEMORANDUM - 148

Machinery Rationing-155

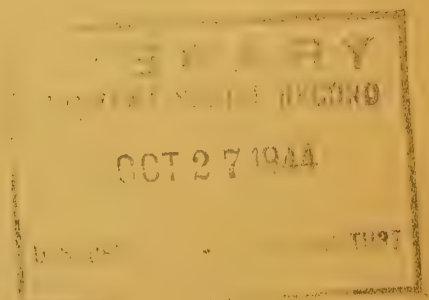

SUBJECT: Sheet Metal Water Well Casing, Irrigation  
Pumps, Irrigation Pumping Units, Electric  
Motors, and Internal Combustion Engines

The revocation of Supplementary Order 6, and the amending of Supplementary Order 1, WFO-14, effective September 28, 1944, have:

1. Removed all distribution and rationing controls from sheet metal water well casing, irrigation pumps, and irrigation pumping units.
2. Cancelled WFA and WPB coordinated procedure for approving irrigation enterprises and rationing irrigation pumping equipment as set forth in Special Services Memorandum 103, dated June 10, 1944.
3. Cancelled the necessity for the procedure outlined in Special Services Memorandum 124, dated August 5, 1944, which required State committees to send to the Regional Directors copies of approved WPB-541 applications for internal combustion engines over 20 h.p.

Electric Motors and Internal Combustion Engines

To obtain an electric motor of one h.p. or over or an internal combustion engine over 20 h.p. for irrigation purposes, a farmer must apply for priority assistance to a field office of the War Production Board on WPB Form 541. The recommendation of the county committee is not required but will be helpful and may expedite the handling of the application. To obtain electric motors for other purposes refer to Special Services Memorandum 110, Supplies 50.

INSTRUCTIONS TO APPLICANT IN FILLING OUT FPA FORM 6

General:

The purpose of this form is to provide the county or State Agricultural Conservation Committees and Feed Advisory Committees with the facts needed to determine your need for protein meal as compared to the need of other applicants. The facts requested on the form are required from any dealer or mixer before his application for an allocation of oil meal can be considered. Your need is determined by the relationship of your available supplies to your average use and/or sale in the same month of 1942 and 1943. If you apply for an amount which will raise your available supply above the 1942-43 average for the same month, you must supply additional facts adequate to justify an exception being made in your case. Such requests will be granted only under the most exceptional circumstance. Where records are not available from which to secure the information requested, the best estimates of the applicant will suffice.

Specific:

1. Enter the name of the month for which you expect to receive allocation in the blank just below the title of the application. All reference to "above month" in the column heads refers to the name entered in this blank.
  2. Enter in the two columns under the first heading the tons of all the protein meals listed on the form which you have used or expect to use before the first of the month for which application is made. The tonnage entered should be divided into two parts: (1) tons used in the manufacture of feeds for sale, and (2) tons delivered as straight ingredient or for custom mixing for users.
  3. Enter under the second heading your historical use or sale of protein meals. The figures entered under this heading shall be (1) your 1942-43 average use during the month named in the application of the protein meals listed on the form in the manufacture of mixed feeds for sale, and (2) your 1942-43 average deliveries of protein meal as straight ingredient or for custom mixing during the month named in the application.
  4. Enter under the third heading your available supply of the protein meals listed on the form for the month for which application is made, giving first your inventory of materials on hand and second your expected receipts other than what you expect from this application.
  5. Under the fourth heading enter the tons of meal you are requesting the State to allocate to you during the month named in the application. Each application applies to one month only.
  6. Do not forget to check the information and fill out the identification requested at the bottom of the form.
- Your careful execution of this form will facilitate consideration of your application.
